### ENGINE

1,494 cc four-stroke, Rotax® with three cylinders in-line and four valves per cylinder

iTC™ (Intelligent Throttle Control) system

iControl® Learning Key®

D-Sea-Bel™ system

Closed-Loop Cooling System

Equipped with Advanced Combustion Efficiency (ACE™) technology, this powerful engine comes with a maintenance-free supercharger\* and external intercooler and is optimized for regular fuel for lower fuel cost.

Operating electronically, this advanced throttle system starts you in neutral for easier dockside starts. It also features activity-specific Touring, Sport and ECO® modes that can all be set to accommodate your riding style. The result is a more responsive, more intuitive ride.

The programmable Learning Key allows you to limit the performance of the PWC based on rider skill-level.

Combines a series of resonators and vibration-absorbing components to make Sea-Doo® watercraft some of the quietest on the water.

Uses coolant to keep the engine running at the ideal temperature, much like a car's radiator. Also keeps out corrosive saltwater and debris.

### FEATURES

iControl® The "Brain" that integrates and controls all systems to create the best possible ride.

ST<sup>3</sup> Hull™ The new benchmark for rough water handling, the fully redesigned ST<sup>3</sup> hull™ is wider, for industry-leading stability at both rest and high speeds and expertly tuned to improve offshore performance.

Touring Mode / Sport Mode Offers a choice between two throttle responses for different riding styles. Touring mode is the default setting offering a more progressive acceleration curve for a more confident ride — ideal for cruising and 2-up riding. Sport mode can be easily activated using the Sport button. It provides full acceleration performance for a more aggressive throttle response.

ECO® Mode This iTC function automatically determines the most economical power delivery and sets the optimal RPM for greatest fuel economy.

Ergolock™ Seat Seat with narrow profile and knee support that lets riders sit in a more natural position and lock in with their legs for more control and less upper body fatigue.

High-Performance VTS™ (Variable Trim System) The VTS™ adjusts the angle of the nozzle to change the behavior of the watercraft and improve parallelism to the water. The high-performance VTS™ provides handlebar-activated quick settings.

Ski Tow Eye For easy and secure attachment of ski rope.

RF D.E.S.S.™ Key With radio frequency technology and a ball-and-socket design, the Digitally Encoded Security System (D.E.S.S.) key provides riders with easy and quick starts every time.

Interactive Multifunction Digital Information Center VTS™, Fuel level, Tachometer, Speedometer, Hour meter, Compass, Clock, Touring mode, Sport mode, ECO® mode, F-N-R indicator and more.

Direct Access Front Storage Gear is now within arm's reach. The industry's first direct-access front storage opens by simply raising the handlebar assembly. No standing required.

LinQ™ Attachment System Exclusive quick-attach system on the swim platform allows for easy installation of storage accessories.

Watertight Phone Box Compartment Waterproof and shockproof phone compartment

### PROPULSION SYSTEM

iBR® (Intelligent Brake & Reverse) system First and only true brake on a watercraft recognized by the U.S. Coast Guard for improving boating safety since 2009. Now in its 3<sup>rd</sup> generation, the intuitive and improved iBR® allows you to stop close to 160 feet sooner<sup>1</sup> for greater peace of mind. All with the squeeze of a lever. And with its electronic reverse, it gives you a level of maneuverability that makes docking easier.

Stainless Steel Impeller Delivers improved acceleration, higher top speed and less cavitation.
