ROTAX® ENGINES (900 HO ACE™, 1503 & 1503 NA)

RETRACTABLE SKI PYLON (ACCESSORY)

ENGINE

899 cc four-stroke, Rotax® with three cylinders in-line and four

The most compact and lightweight engine on the market today. The Rotax® 900 HO ACE™ incorporates valves per cylinder (GTI SE model) crisp acceleration, impressive fuel economy and an excellent power-to-weight ratio.

1,494 cc four-stroke, Rotax® with three cylinders in-line and four valves per cylinder (GTI SE 130 / 155 models)

This naturally aspirated Rotax® engine has been tested and proven to be incredibly reliable and fuelefficient for more than a decade. Plus, the Rotax® 1503 NA is the most powerful, naturally aspirated Rotax® engine on a Sea-Doo offering instant acceleration for instant fun.

iTC™ (Intelligent Throttle Control) system

Operating electronically, this advanced throttle system starts you in neutral for easier dockside starts. It also features activity-specific Touring, Sport and ECO® modes that can all be set to accommodate your riding style. The result is a more responsive, more intuitive ride.

The programmable Learning Key allows you to iControl® Learning Key® limit the performance of the PWC based on rider

skill-level. Combines a series of resonators and vibrationabsorbing components to make Sea-Doo® watercraft

some of the quietest on the water.

Closed-Loop Cooling System

D-Sea-Bel[™] system

Uses coolant to keep the engine running at the ideal temperature, much like a car's radiator. Also keeps out corrosive saltwater and debris.

FEATURES

Polytec™ (for model with Rotax® 900 HO ACE™ engine)

The hull is made of Polytec[™] material, a recyclable, low density and high-impact composite material that includes polypropylene and long glass fiber reinforcements. It was designed to maintain the structural integrity of the watercraft under stress while providing light yet durable parts to support the construction of the product.

iControl®

The "Brain" that integrates and controls all systems to create the best possible ride.

Touring Mode / Sport Mode

Offers a choice between two throttle responses for different riding styles. Touring mode is the default setting offering a more progressive acceleration curve for a more confident ride – ideal for cruising and 2-up riding. Sport mode can be easily activated using the Sport button. It provides full acceleration performance for a more aggressive throttle response.

ECO® mode

This iTC[™] function automatically determines the most economical power delivery and sets the optimal RPM for greatest fuel economy.

Elevated Fuel Filler

Easy access and prevents water intrusion while refueling.

RF D.E.S.S.™ Key

With radio frequency technology and a ball-andsocket design, the Digitally Encoded Security System (D.E.S.S.) key provides riders with easy and quick starts every time.

Interactive Multifunction Digital Information Center

Fuel level, Tachometer, Speedometer, Touring mode, Sport mode, ECO® mode, Hour meter, Compass, F-N-R indicator and more.

PROPULSION SYSTEM

iBR® (Intelligent Brake & Reverse) system

First and only true brake on a watercraft recognized by the U.S. Coast Guard for improving boating safety since 2009. Now in its 3rd generation, the intuitive and improved iBR® allows you to stop close to 160 feet sooner1 for greater peace of mind. All with the squeeze of a lever. And with its electronic reverse, it gives you a level of maneuverability that makes docking easier.

Delivers improved acceleration, higher top

Stainless Steel Impeller

SE PACKAGE Reboarding Ladder

Variable Trim System (VTS™)

Makes reboarding from the water easier

speed and less cavitation.

and quicker. VTS™, Fuel consumption instant

Additional Gauge Functions & average, Clock.

> The VTS[™] adjusts the angle of the nozzle to change the behavior of the watercraft and

improve parallelism to the water. Ergonomically designed for comfort and great

looks providing ultra-plush seating for three – permits rear-facing spotter for watersports.
